

ED Research System — Summary (Freeze Snapshot)

Timestamp: 2025-08-24 12:42 UTC

Summary: Phase 1 (Ops) and Phase 2 (Clinical integration) are COMPLETE for the advice

What works now

- Tracker: moves logging, equipment finder, overdue view, movement analytics.
- QR: generate and manual fallback to update location.
- SOPs: offline-safe auto-pull surface; search; basic checklist display.
- UI: adjustable thresholds for equipment overdue and vitals overdue; split helpers -
- ML: advice-only MLP bundle loaded; feature shim on MIMIC-IV-ED demo; CSV outputs w
- Gate engine: TTL_MAX_OK, GATES_WIRED_OK, PHASE2_BUNDLE_SMOKE_OK are all green.

How to run safely

- Use overlay CFG for tests (do not mutate frozen CONFIG).
- Keep outputs under /kaggle/working or CONFIG['DATA_ROOT'].

Next increments

- Build labels & multi-task heads for: clinical complexity, resource intensity, 4h d
- time-to-dispo, workup completion (advice-only).
