

APONA vs. Your FSM - Gap Analysis

This comparison maps your defined FSM states against the generic APONA process scaffold to identify coverage and potential drift.

EMS pre-alert & patient data ingestion

Covered by: major_trauma.ems_prealert

Triage & initial administrative intake

Covered by: major_trauma.resus_arrival, major_trauma.primary_survey, chest_pain.triage, pregnant_syncope.triage

Diagnostic initiation (labs, imaging)

Covered by: major_trauma.fast_ct_parallel, chest_pain.ecg_and_labs, chest_pain.imaging_optional, pregnant_syncope.initial_workup, pregnant_syncope.fetal_assessment

Continuous monitoring & SLA tracking

Covered by: major_trauma.results_review, chest_pain.risk_stratify

Capacity/bed availability check

Covered by: chest_pain.observation_or_admit, pregnant_syncope.routing_decision

Specialist notification & coordination

Missing: No FSM mapping found

Disposition & transfer/admission

Covered by: major_trauma.disposition, chest_pain.disposition, pregnant_syncope.disposition
